

ERASMUS, "FIT-FOR-JOB" PROJECT, 14-20/02/2016

Ducati's visit and Bologna (day 1)

We arrived at the Ducati's factory and we got split up in two groups. We started a very interesting tour in the factory and we saw how they work inside. The guide told us a lot about the story and the work of the factory. Then we went to the museum and the guide showed us different bikes produced there. We walked around in the museum and took many photos.

We moved to Bologna city centre and we had lunch there. We had some free time and we went shopping. Then some Italian people told us something about Bologna and the main monuments. We visited Santo Stefano's church and we took a photo of the whole group. Then we drove home with the bus.

Ravenna: Mosaic (day 2)

We visit Ravenna and all the churches of the city. We also saw the tomb of Dante Alighieri, the great poet. We had lunch with a typical dish of Ravenna, a piadina. It was so good and tasty. In the afternoon we did a workshop where we could make our own mosaic. We walked a lot and it was very rainy, but it was really funny to be together with the other students.

Maranello: Ferrari workshop; Modena (day 3)

We arrived at Ferrari museum and a very kind man did the workshop and told us about the brand. After the presentation we did a pit stop by ourselves and German students won, it was very cool. Then we went to Modena and we had lunch in a hospital. It was good for being a hospital. We walked for the main street of Modena and we visited the church, Italian students told us a bit about the history of Modena. It was very interesting.
